Remember CHARLIE

In 1980, Charles T. Morecraft was an employee of Exxon Corporation. He was a good, dedicated employee - just like hundreds of thousands of other blue-collar workers. After more than 15 years experience on the job, he knew all the rules and safety regulations...and the shortcuts around them, too. He was certain that nothing could go wrong when a seasoned worker like him was in control, and he was right - until he was critically injured in an explosion. Anyone who hears Charlie's story will be deeply moved and motivated to never again take safety for granted.
